

architectingIT

This is newsletter #21, covering posts and news up to the end of February 2016.

It's been a while since we've sent out an update on latest posts. Over the last few months the site has been redesigned with a lot more graphics and pages.

The [Events](#) section now covers a list of industry events we've attended, plus links to content that's been generated. There's also a new page covering blog post [series](#).

This week sees two events, first, Pure Storage's first user conference called [Accelerate](#) and [Storage Field Day 9](#) with the Tech Field Day crew. Accelerate is not streaming live due to issues at the venue, however SFD9 will be online as usual at the [techfieldday.com](#) website.

Thanks for reading and following the site!

Chris Evans
