This is newsletter #39, 2018-W1 published on 6 January 2018.

# architectingIT

## Changes for 2018

Thanks to everyone who completed the 2017/2018 survey. In case you still want to take part, the survey is still open (until the end of the month) and is only five questions lasting less than 2 minutes. Just click on the button at the end of this text.

Initial feedback suggests a weekly summary of blog posts is most preferred, so the monthly summary will become weekly from now on. The weekly curated content list will be dropped/merged into this single weekly email.

Thanks again for reading and here's to an interesting 2018!

Chris Evans

## Content for 2018

In 2018, we will be focusing on looking at new content. Feedback from the survey indicates that more video and podcast content would be welcome. We're working on plans for that in the coming months.

We also have a publication schedule for more independent white paper work. The current editorial timetable is as follows (published at the end of each month):

- **January 2018** - *Containers and Persistent Data*
- **February 2018** - *Flash in the Enterprise*
- **March 2018** - *Object Storage*
- **April 2018** - *Software Defined Storage*
- **May 2018** - *Public Cloud Storage*
- **June 2018** - *Modern Storage Architectures*
- **July 2018** - *Cloud Databases*
- **August 2018** - *Data Protection in the Cloud*
- **September 2018** - *Data Mobility for the Hybrid Enterprise*
- **October 2018** - *Container Orchestration for the Hybrid Enterprise*

If you're a vendor/start-up that feels you should be included/referenced in these papers or would like to sponsor, please get in touch.
